## ILLUSTRATED PARTS BREAKDOWN (IPB)

The IPB is used to identify a part and its location in a hardware product. The document references specific item numbers in the associated parts list.

### HOW TO USE THE IPB

1. Locate the figure containing the item of interest.
2. Locate the number (callout) of the item of interest.
3. Locate that item number in the associated parts list.

### FORMAT

Each IPB is generally organized based on its first figure. All other assemblies and subassemblies are referenced from this figure. Each figure contains numeric callouts of all major parts (items).

### PARTS LIST

Each parts list contains the following:

**Figure and Item No.** – Lists the figure number and its referenced numeric callout

**Description** – Presents the name and a brief description of the item. A single asterisk (\*) preceding the description denotes item is a

subassembly to its referenced figure. A double asterisk (\*\*) preceding the description indicates that this item is subordinate to the preceding single asterisk item.

**DEC Part No.** – Lists the Digital/Vendor part number. The letter in the column heading indicates the current revision level of the Engineering Drawing for the referenced figure.

**ECO Cut-In** – Lists the top assembly drawing number and revision level at first printing. All additional revisions to an item are listed in this column.

**Used On Code** – Lists letters referring to the product variation assigned in Figure 1. When this column is blank, the item is used in all variations.

**Ref Fig No.** – Lists a cross reference between figures within the IPB.

### PART NUMBER/PART DESCRIPTION INDEX SECTION

Lists items by part number numerically, and description alphabetically. Items are also referenced to a location within the IPB by figure and item number.

This exploded view diagram illustrates the assembly of a mechanical component. The parts are numbered as follows:

- 9**: A long, thin rectangular plate with a U-shaped profile.
- 1**: A bracket with a vertical flange and a horizontal base.
- 12**: A small cylindrical pin or screw.
- 15**: A bracket with a vertical flange and a horizontal base, similar to part 1 but with different dimensions.
- G36**: A small cylindrical pin or screw.
- 13**: A long, thin rectangular plate with a U-shaped profile, similar to part 9.
- 13A**: A small rectangular plate.
- 13B**: A small rectangular plate.
- 10**: A small cylindrical pin or screw.
- B**: A bracket with a vertical flange and a horizontal base.
- 6**: A small cylindrical pin or screw.
- 11**: A small cylindrical pin or screw.
- A**: A bracket with a vertical flange and a horizontal base.
- 8**: A small cylindrical pin or screw.
- 3**: A small cylindrical pin or screw.
- 2**: A bracket with a vertical flange and a horizontal base.
- 16**: A small rectangular plate.
- 14B**: A small rectangular plate.
- 14C**: A small rectangular plate.
- 14A**: A small rectangular plate.
- 14**: A long, thin rectangular plate with a U-shaped profile.
- 17**: A bracket with a vertical flange and a horizontal base.
- G31**: A small cylindrical pin or screw.
- 4**: A long, thin rectangular plate with a U-shaped profile.
- 3**: A small cylindrical pin or screw.
- 5**: A bracket with a vertical flange and a horizontal base.
- G15**: A small cylindrical pin or screw.
- B**: A bracket with a vertical flange and a horizontal base.
- A**: A bracket with a vertical flange and a horizontal base.
- 7**: A long, thin rectangular plate with a U-shaped profile.
