SERIES 60 (LEVEL 68)  
MULTICS STORAGE SYSTEM  
PROGRAM LOGIC MANUAL  
ADDENDUM A

**SUBJECT**

Description of the Multics Storage System

**SPECIAL INSTRUCTIONS**

This is the first addendum to the Program Logic Manual (PLM) that describes certain internal modules constituting the Multics System. It is intended as a reference for only those who are thoroughly familiar with the implementation details of the Multics operating system; interfaces described herein should not be used by application programmers or subsystem writers; such programmers and writers are concerned with the external interfaces only. The external interfaces are described in the *Multics Programmers' Manual, Commands and Active Functions* (Order No. AG92), *Subroutines* (Order No. AG93), and *Subsystem Writers' Guide* (Order No. AK92).

Change bars indicate where technical changes have been made. Appendix A is new and does not contain change bars. The changes contained in this addendum will be incorporated into the next revision of the manual.

**Note:**

Insert this cover after the manual cover to indicate the updating of the document with Addendum A.
